

CYBERSECURITY SERVICES FOR A CHICAGO ACCOUNTING FIRM

COVERAGE PLAN

Managed Security Service Provider (MSSP)

COMPANY BACKGROUND

The client is a Chicago-based accounting firm focused on losses, such as property damage and business interruptions.

BUSINESS CHALLENGE

The client serves Fortune 100 and 500 companies and assists them in dealings with insurers, so they needed to maintain compliance and the best possible cybersecurity posture.

STRATOSPHERE NETWORKS SOLUTION

The client had built an internal database for tracking claims and opening tickets that they needed to make sure met their customers' compliance and security standards. Stratosphere's senior IT consultants worked with the client and one of our trusted partners to understand the client's requirements and ultimately recommended migrating their application to Microsoft Dynamics, which not only provides the necessary security and compliance tools but also provides the client with a platform on which to grow and manage their business.

To achieve the best possible security posture, the client has also signed up for Stratosphere's Managed Security Service Provider (MSSP) offering, including the following solutions:

- ★ Security risk assessment
- ★ Creation of a comprehensive IT security strategy
- ★ Compliance assistance
- ★ Security Operations Center as a Service (SOCaaS)
- ★ Virtual CISO (vCISO)
- ★ Endpoint Managed Detection and Response (MDR)

BENEFITS

Our MSP and MSSP solutions and services benefit the client in the following ways:

- ★ Greater appeal to customers with high-level security and compliance needs
- ★ Lower data breach risk level
- ★ Overall better security posture

Ultimately, the client can now assure the companies they work with that they have advanced security controls in place to safeguard their data against evolving threats. This helps them stand out in their industry in addition to improving the customer experience (CX) they deliver.
